<p><i>The tally on the right is nothing more than my wild guesstimate of how many Barils are the offspring of Jean Baril since the mid 1600s. I started with his 15 children (not actually confirmed all those 15 actually existed) then I zeroed any who appeared to have not live long, then I assumed on average that 3 children were born to each surviving person. I will work to improve the accuracy of that number over time as I solidify facts. I will NEVER be able to get it perfect. That is for those who will come after me to do.</i></p>																			5,402,968
